\* Gestational age based on the clinician's estimate (Alabama, Alaska, Arizona, Connecticut, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Jersey, New Mexico, New York City, North Carolina, North Dakota, Ohio, Oregon, Rhode Island, South Dakota, Tennessee, Vermont, Washington, and West Virginia); gestational age calculated from the last normal menstrual period (Oklahoma and Utah); clinician's estimate of gestation based on estimated date of conception (Virginia); probable postfertilization age (Arkansas and Texas); clinical estimate for a portion of the year and probable postfertilization age for a portion of the year (South Carolina).

† Data from 42 reporting areas; excludes 10 areas (California, District of Columbia, Illinois, Maryland, Massachusetts, New Hampshire, New York State, Pennsylvania, Wisconsin, and Wyoming) that did not report, did not report by gestational age, or did not meet reporting standards.

§ Percentages for the individual component categories might not add to 100% because of rounding.

**SUPPLEMENTARY TABLE 14. Number of deaths and case-fatality rates\* for abortion-related deaths reported to CDC, by type of abortion — United States, 1973–2017†**

**Abbreviation:** CFR = case-fatality rate.

\* Number of legal induced abortion-related deaths per 100,000 reported legal induced abortions. Because a substantial number of legal induced abortions occurred outside reporting areas that provided data to CDC, national CFRs (i.e., number of legal induced abortion-related deaths per 100,000 reported legal induced abortions in the United States) were calculated with denominator data from the Guttmacher Institute's national survey of abortion-providing facilities. Case-fatality rates were computed for consecutive 5-year periods during 1973–2017 because rates based on <20 cases might be unstable.

† Certain numbers might differ from those in reports published previously because additional information has been supplied to CDC subsequent to publication.

‡ An abortion is defined as legal if it was performed by a licensed clinician within the limits of state law.

¶ An abortion is defined as illegal if it was performed by any person other than a licensed clinician.

\*\* Unknown whether abortion was induced or spontaneous.
